

State Lands Mapping Joint Subcommittee

6/7/23 8:00 AM

Online Meeting via Zoom

Attendees:

RMAC: Mark Hemmerlein, Michele L. Tremblay, John Magee, Larry Spencer, Cory Ritz

LMAC: Mark Hemmerlein

NHDES: Nisa Marks

Guest: Shane Bradt

Today's objective: electronic ground truthing of the tool in a selected geographic area.

Since last meeting Mark and Shane added criteria for parcels >0.5 acre and parcels adjacent to conservation land, bringing total possible parcel score up to 10. Shane also added the ability to filter the map for only parcels in a particular size range (e.g. 10 – 100 ac.). However, the light-up checklist does not include size >0.5 ac. There is also now a comments tab for each parcel.

The public access criterion is whether there is a road that accesses the parcel; it does not evaluate whether that road provides access to water.

The group reviewed parcels in Warner. Recommendations on parcel disposal were notated as subcommittee recommendations, to differentiate from recommendations reviewed by the full RMAC or LMAC. Mark said he will add a domain pulldown with options "subcommittee retain" "RMAC retain" "LMAC retain" etc. There will be separate comment fields and recommendation options for RMAC and LMAC so the two groups can select the parcels relevant to them and see their respective rationales for retention or disposal.

Next meeting will be Thursday June 15 at 8:00 by zoom.
